

Symbol	Means	Example
1	exactly one	A pet lives at exactly one address
0..1	zero or one (optional)	A member has at most one locker
0..*	zero or more	An address can house zero or more pets
1..*	one or more (at least one)	A recipe has at least one ingredient

can house
zero or more
pet

1..*

one or more
(at least one)

A recipe has
at least one
ingredient

Reading a whole line

Take `Category 1 - 0..* Recipe` and read it both ways:

- From Recipe's side: each recipe has exactly 1 category.
- From Category's side: each category has 0..* recipes.

Relationship types

- One-to-many (`1 - 0..*`): the most common. The "m" side holds the FK.

• Ask: "can this exist with none of the

07:22

• From Recipe's side: each recipe has exactly 1 category.

- From Category's side: each category has 0..* recipes.

Relationship types

- **One-to-many** ($1 - 0..*$): the most common. The "many" side holds the FK.
- **One-to-one** ($1 - 1$ or $1 - 0..1$): rare. Either side can hold the FK.
- **Many-to-many** ($0..* - 0..*$): not allowed in your logical design. Replace it with a bridge table: two one-to-many lines.

Choosing $0..*$ or 1 ↓

...ed in your logical design. Represent it
with a bridge table: two one-to-many

ies.

Choosing $0..*$ or $1..*$

- Ask: "can this exist with none of the other?" If yes, use $0..*$.
- Ask: "must there be at least one?" If yes, use $1..*$.
- Example: a recipe must have an ingredient ($1..*$), but a new ingredient may not be used yet ($0..*$).
- If the question doesn't say, $0..*$ is the safer default, and write down your assumption.

Quick checks

- Is there a 1 on every line? If both ends are 1 , you've missed a bridge table

Can you make a word document for this

07:22

Example: a recipe must have an ingredient (1..*), but a new ingredient may not be used yet (0..*).

- If the question doesn't say, 0..* is the safer default, and write down your assumption.

Quick checks

- Is there a 1 on every line? If both ends are *, you've missed a bridge table.
- Is the FK on the end that has the *?

Want a few practice questions where you read the multiplicities and tell me what they mean?
